

Specification of Single Chamber Temporary Pacemaker

It should have following feature:

- Modes: Synchronous (AAI/VVI) (demand) and asynchronous (AOO/VOO)
- Base level pacing rates: 30 - 180 ppm (continuously adjustable) $\pm 10\%$
- Rapid atrial pacing rates: 80 - 380 ppm (5 ppm increments $\pm 10\%$), 380 - 540 ppm (10 ppm increments $\pm 10\%$), 540 - 800 ppm (20 ppm increments $\pm 10\%$)
- Output amplitude: 0.1 - 20 mA (continuously adjustable)
- Pulse width: 1.8 ms $\pm 10\%$
- Sensitivity: ASYNC., 0.5 to 20 mV (continuously adjustable)
- Blanking: Pace- 125 ms (+ 50 ms; - 0 ms), Sense: 75 ms (+ 50 ms; - 0 ms)
- AC (50 Hz) Interference Rejection
- Battery: AA-size alkaline for use of more than 15 days
- DC Leakage Current Measurements per IEC 601

Warranty: 2 year onsite

Standard: European CE/US FDA

Service: Service center should be available in Mumbai
