

1. Technical Specification for Fire retardant Apron:

- Flame Retardant APRON made from Klopman Gemini Fabric in 100% cotton FR 340gsm.
- FR thread is used to stitch the Apron
- Certified to EN ISO 11612:2008 Class A1, A2, B1, C1, E3, and F1.
- The fabric is not treated with flame retardant chemical but the fibre is treated with flame retardant chemical so as to ensure higher durability of FR properties after repeated laundering.
- Provide protection against accidental exposure to flash fire, heat at work place, welding spatter and molten metal spatter / splash.
- Comfortable to wear and does not cause any skin irritation or harmful effects.
- Fabric when exposed to flame does not melt, drip or stick to the skin of the wearer and does not cause burn injury.
- Size 24" x 36"
